FamilyVoices, Inc., was founded by family leaders concerned about the changing health care environment and the implications for our children with disabilities, chronic illnesses, or other special health care needs. Operated by and for families in our state FamilyVoices:

- ♥ Educates families and professionals about quality programs and best practices for children with special health care needs
- ♥ Assists families to navigate health care and related service systems and avoid or overcome barriers to care for their children
- ♥ Trains families to be the best possible advocates for their children's health
- ♥ Trains professionals to work with families
- ♥ Supports families to have a voice in the design, development, implementation, and monitoring of health policies and programs for children and families
- ♥ Works with professionals and families to improve children's health policies and programs in ways that are helpful to families
- ♥ Promotes family-centered care, family/professional partnerships, and Medical Homes for children with special health care needs
- ♥ Helps document family needs and family stories as a basis for policy planning and service implementation
- ♥ Outreach to families and professionals to raise awareness for children's health issues and build the network of FamilyVoices

Newborn Hearing Screening
(615) 262-6160**

Your Newborn Hearing Parent Consultants will be able to:

- ♥ Answer any Questions you have
- ♥ Share their experiences in parenting a child who is deaf or hard of hearing
- ♥ Share ALL the options you have to communicate with your child
- ♥ Connect you with resources and families that might help you

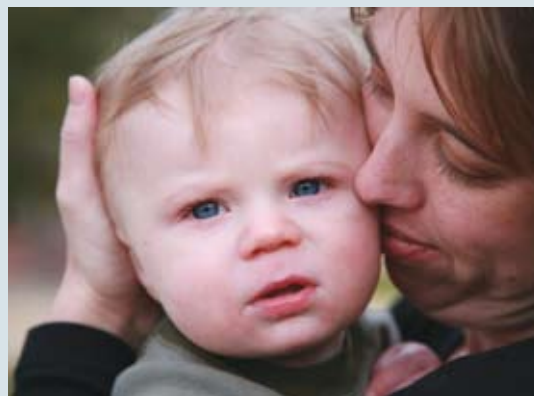

“When we found out that our son was deaf, it was devastating and overwhelming. I can’t express enough how much it meant to have another parent that understood what we were going through. Our parent consultant was invaluable to our family.”

Who are the Parent Consultants?

Parent Consultants are parents just like you who have children of various ages who are deaf or hard of hearing. Some of the emotions and questions you may have may be the same emotions and questions our parent consultants had.

We strive to provide support services to families of children who have been recently diagnosed as deaf or hard of hearing as well as families

who have known of their child’s hearing loss for some time.

We have been trained to provide information and support and are committed

to providing an unbiased look at raising a child who is deaf or hard of hearing. All forms of communication are supported including:

- amplification
- cochlear implantation
- signing
- cueing
- spoken language

We believe that parents know what is best for their child and family but need enough information to make good, informed choices. We take pride in keeping abreast of all the experts, resources, and people that might be able to help you.

- All information about your child and family is kept private.
- Can work with you no matter where you live in Tennessee.
- Services are provided at no cost and are based on the needs of each individual child.
