# Some things a baby with normal hearing should be able to do:

### Birth to 3 Months of Age

- · Blinks or jumps when there is a sudden, loud sound
- · Quiets or smiles when spoken to
- Makes sounds like "ohh," "ahh"

### 3 to 6 Months of Age

- · Looks for sounds with eyes
- Starts babbling ("baba," "mama," "gaga")
- · Uses many sounds, squeals, and chuckles

### 6 to 9 Months of Age

- · Turns head toward loud sounds
- · Understands "no-no" or "bye-bye"
- Babbles, for example "baba," "mama," "gaga"

## 9 to 12 Months of Age

- · Repeats simple words and sounds you make
- · Correctly uses "mama" or "dada"
- · Responds to singing or music
- · Points to favorite toys and objects when asked

If you have questions about your baby's hearing or this list, talk with your baby's health professional.

## Where else can I get information?

# Can Your Baby Hear? Your Baby's First Hearing Test

# Why should my baby's hearing be tested?

- Most babies can hear well at birth, but a few do not.
- We test all babies to find the ones who may not be able to hear.
   Testing is the only way to know if a baby has hearing loss.
- It is important to find hearing loss as soon as possible. Babies whose hearing loss is not found early will have a hard time learning.
- If we find hearing loss early, there are many ways we can help your baby.

Make sure your baby's hearing is tested before you leave the hospital.

#### What should I know about the test?

- The test is safe and painless and can be done in about 10 minutes.
- · Most babies sleep through the test.
- You will get the test results before you leave the hospital.
- Be sure to tell the hospital the name of your baby's health professional or clinic so they can send them the results.

# Why do some babies need another hearing test?

• Some babies may need another test because:

'fluid in the ear 'noise in the testing room 'baby was moving a lot 'baby has hearing loss

- Most babies who need another test have normal hearing.
   Some will have hearing loss.
- If your baby does not pass the hearing test, make sure he or she is tested again as soon as possible, and by no later than one month of age.

# Can a newborn baby pass the hearing test and still have hearing loss?

 Yes, some babies hear well enough to pass the first test, but lose their hearing later because of:

'some illnesses 'some medicines

'some injuries 'a family history of hearing loss

- · Watch for signs of hearing loss as your baby grows.
- · Use the list on the back cover as a guide.
